Cheese
Some cheese is now allowed in the galactosaemia diet but you must choose carefully as not all cheese is suitable.

Samples of various cheeses have been analysed to determine their lactose and galactose content. The following cheeses were found to be suitable for people with galactosaemia:

- Emmental
- Gruyere
- Italian Parmesan
- Grana Padano
- Jarlsberg
- Comte

These cheeses provide a source of calcium in the diet. Here are some examples:
